### Vantage

The Vantage spatial sounder with its new 32-Tone software offers flexible sound output, combined with a compact modern design. Available in red or white, with two base options, both incorporating a BS5839 compliant locking device.

▮ [Read More!](#)

### Vantage-Combi

The Vantage-Combi combines all the features of the Vantage spatial sounder with a LED beacon, satisfying the increasing demand for a low current, high output sounder/beacon unit at a competitive price.

▮ [Read More](#)

### Vantage-Beacon

This new product offers a low profile design, combined with low current - high light output performance, making the Vantage-Beacon ideal for both new and retro-fit applications.

▮ [Read More](#)

### Vector

The Vector combines a high clear sound output in a compact low-profile package. Designed to match all major commercial grade smoke detectors, its substantial area for cable entry and rising clamp terminals ensure rapid cost effective installation.

▮ [Read More](#)

### Vara

A unique design giving excellent lateral sound output making the Vara ideal for both corridor and room applications. Designed to fit a single gang back box, the Vara can be easily surface or flush mounted. Available with the option of twin high output LED's, making a cost effective audio-visual alarm.

▮ [Read More](#)

### Viper

The Viper is a popular choice due to its high sound output and the options of 32 tone and 230 Vac versions. A further option available is the Vocalarm voice enhanced sounder.

### Remote Indicators

### Auxiliary Relays

Certificate Number 546

A range of remote LED indicator units designed to give local indication of individual or groups of fire detectors in alarm. Suitable for use on both analogue addressable and conventional systems, versions are available with or without text.

### Door Retainers

Our range of magnetic door retainers offer good looks combined with reliable performance and economy. Options include rugged vandal resistant models as well as floor mounting brackets and keeper plate chains.

[Read More](#)

### Power Supply Units

The 300 series power supply units provide 27.6 Vdc at the designated current. Batteries are monitored and a fault condition is given via the relay fault fitted. If required, EN54 pt 4 approved versions are also available.

[Read More](#)

Cranford Controls' range of auxiliary relays offer a cost effective solution to applications requiring the switching of ancillary equipment. Rated at 5 Amp 230 Vac, PCB only and boxed versions are available, as is a 12 volt dc version.
